technical data sheet

Machine construction:

- All parts are aluminium and stainless steel. The heated sealing head body is protected by a stainless steel guard to prevent the operator from coming into contact with this part of the machine.
- The MK3 machine offers electronically controlled cycle time as well as temperature making the machine ideal for R&D, material testing and production of packed product.
- Sealing temperature is electronically controlled with a range of 0 – 300° C
- The sealing head is pneumatically operated and is therefore not operator dependant.
- The MK3 machine can also be supplied with height adjustment that allows increased flexibility.

INSTALLATION

Mains voltage	110 - 240 V AC
Frequency	50 / 60 Hz
Total loading	275 / 450 Watts (dependent on heater element)
Fused @	3 amps
